

BIONEXT

LABORATOIRE LUXEMBOURGEOIS
D'ANALYSES MÉDICALES

Paediatric sample collection *from birth*

Looking after little ones
Excellence at the service of your children

Take advantage of the expertise of our nurses specialised in paediatrics!

Care that is tailored for children

Taking a blood sample from a child requires particular skills.

Our specialised nurses are trained to turn what can sometimes be a stressful time into a reassuring experience.

Our commitments for the well-being of your child

Capillary sampling

An ideal technique for very young children.

Setting up a relationship of trust with the child

To create a climate of safety and confidence.

Support for parents

Clear and kindly communication to support you at every stage.

A peaceful sampling

We use proven methods such as distraction through play to relax the child during treatment.

How to prepare for your visit?

Our tips for preparing your next visit are available on www.bionext.lu.

You want the best for your child?

So do we!

That is why we have invested in the best equipment to make sampling easy for them, suitable for their age and weight.

Our innovative equipment for their comfort

Last-generation capillary sampling system

Less painful for your child.

Improved paediatric needles

To halve the sampling time, at the same time minimising pain.

Microtubes

Less blood is collected, with less stress and optimum testing quality.

Bravery: Mission accomplished!

Blood sample collection is a **stressful time** for a child. After the procedure, your child will get their very first “**Brave Child**” diploma as a reward!

BIONEXTKIDS
